

Vebra HIPS

Order your HIPS via your Vebra software – it's quicker, easier and more accurate

Vebra has joined forces with leading HIPS suppliers including LMS, myhomemove, OpenBook, movewithus and Simply HIP* to offer fully integrated HIPS ordering via your Vebra software.

Once you've entered property data into your software, a simple process allows you to order a HIP direct from your chosen supplier. All the relevant data is sent automatically, saving you time and effort and minimising the potential errors when entering data twice.

- Tracking tools enable you to monitor the progress of each HIP. You will be alerted when it is completed – enabling you to market the property as soon as you are legally allowed
- Each HIP will be delivered online, ready for you to insert the EPC into your property details. Reports are also available in hardcopy and on CD-rom

Veبرا HIPS

- Clients can pay upfront or on a deferred basis
- HIPS can be white labelled, allowing you to brand them with your own logo
- Subject to the HIPS provider's terms and conditions, agents can add their own margin to the base price to further increase revenues
- Each HIP will be ready in a matter of days, subject to an assessor gaining timely access to the house and the facilitation of searches by local authorities and water companies

HIPS suppliers available from your Veبرا software include;*

movewithus

*Not all suppliers listed are integrated with each Veبرا software package.
